It has been a great learning experience with TWSS. Financial Modeling & Valuation is considered to be one of the most sought-after skills in finance domain. Being a CA I had a good knowledge of financial reporting, however TWSS helped me gain confidence and expertise in the area of financial modeling and valuation. They make understanding of the concepts and techniques very easy with the real-life examples. The course could give an excellent start to newbies in finance domain and experienced individuals get a good technical add-up to their existing CV. The faculty members are supportive and are easily approachable. The placement team is very helpful and understanding. It's a highly recommended course from my end to existing or aspiring finance professionals.

I joined TWSS with much skepticism about the flagship course on "Financial Modelling and Valuation" and to claim of completing it within 6 weeks. I looked it merely as an marketing gimmick initially, but contrary to my belief, the course turned out to be very well-structured, highly nuanced, well-defined pedagogy, distribution of case studies along with guidance support from gurus who have worked full time as investment bankers. The program brought theoretical knowledge and practical applications at same time. The magnitude of learning has increased manifold. My peers from non-finance backgrounds were also able to eventually grab on to the concepts due to proper mentoring and timely resolution of doubts.

I recently completed the financial valuations certification course at The Wall Street School, and I must say it was an outstanding experience. The course curriculum at The Wall Street School is comprehensive, well-structured, and up-to-date with the latest industry practices. Each module was thoughtfully designed, covering a wide range of topics. Additionally, I am grateful for the exceptional placement support provided by The Wall Street School. Puneet Sir went above and beyond to help me secure a placement in a reputed company in the financial industry. His vast network and industry connections were instrumental in facilitating interviews and job opportunities. I am now employed in a good company, and I owe it to the guidance and support of Puneet Sir and The Wall Street School.

Great experience, amazing course, awesome faculty. I have completed my "financial modelling and valuations course" at the wall street school and it has been a wonderful journey there. I have got a lot of new learnings, understood the practical application of valuations and all the topics. This course is beautifully structured and each and every faculty is committed to deliver the best results. Everyone is very helpful. The Placement team is also very humble and they always will get placed. All the queries were answered no matter how many times I have asked. I will again say Great experience, Amazing course and Awesome faculty.

The Financial Modelling & Valuation program provided me with an exceptional experience. It was highly practical and focused on hands-on learning, requiring me to invest more effort and dedication than ever before. Thankfully, with the invaluable support and guidance from TWSS(The Wall Street School), I not only overcame the challenges but also successfully embarked on my journey in the field of finance. I am sincerely grateful for this opportunity and wholeheartedly recommend the program to others seeking a transformative learning experience for life. If you already have basic knowledge of accounting and finance, I believe this course is not intended for total beginners. The more knowledge you have, the more this course will enhance your understanding.

I attended the 6 weeks investment banking and valuations course at TWSS. The program is extremely well-structured and makes us ready for the industry. Discussions on practical scenarios and valuation exercises were very helpful. Endre teaching faculty were experienced and knowledgeable. The placement team was very resourceful in finding the best available career options.

I'm grateful that I joined the investment banking program at TWSS. The course was very detailed and well-organized to give you the exposure to work with a practical approach. The theoretical part is covered practically which gives a great insight into the kind of work you will actually do on a daily basis once you get into the industry. If someone wants to get into finance this course can give an edge. Also, I'm very thankful for the placement team and their coordination, it got placed within a month. Great help and seamless experience.

My experience at The Wallstreet School began with a need for a career switch from core Science to core Finance. One of my friends recommended to attend a counselling session from TWSS. When I first spoke to Himanshu sir, Without any second thought and doubt, I decided to pursue investment banking and CMA course from here. And it is one of the best decisions of my life until now. Himanshu sir Thank you so much for your selfless support. The Financial Modelling and Valuations Course is formulated in a structured manner covering so many topics that it becomes hard to believe that you learn so much in such a short span of time. Also, all the faculty members are really knowledgeable with a vast experience, so the content delivery is also great. Talking about their placement services, they are pretty great. The people in the Placement Team as well as the faculty members are very helpful and supportive. So it was a 10/10 experience. Thank you for providing me the opportunity and a wonderful experience.
